Evidence layers and final-system acceptance
Independent-layout ISA reference
fixed model / inputs / native format
Protocol / CDC tests
identity, cancellation, retirement
Independent DDR hardware
10 configuration cold starts
2 GiB + 1837.498 s stress
Full-model RTL simulation
64 builds + 2 query pairs
KV / logits / immutable regions
Final NPU + MIG implementation
STA / CDC / reset / DRC reviewed
Final-bit DDR + full-model hardware
256-token prefix / 100 query batches
10 object rebuilds
Recovery snapshot: 10 cancel / 10 error / 9 reset
Full matrix + loss test pending
Same-resource comparison
rebuild vs reuse
compute + cleanup + transport
